Pedestrian Facilities & Amenities

Borough of Bay Head Complete Streets
Bicycle & Pedestrian Plan

Sidewalks

This sidewalk in Bay Head, NJ provides a safe environment for pedestrians.

Curb Ramps

Intersections should have two perpendicular, ADA compliant curb ramps per corner.

High Visibility Crosswalks

High-visibility crosswalks have been shown to increase motorist yielding and channelization of pedestrians.

Raised Crosswalk or Intersection

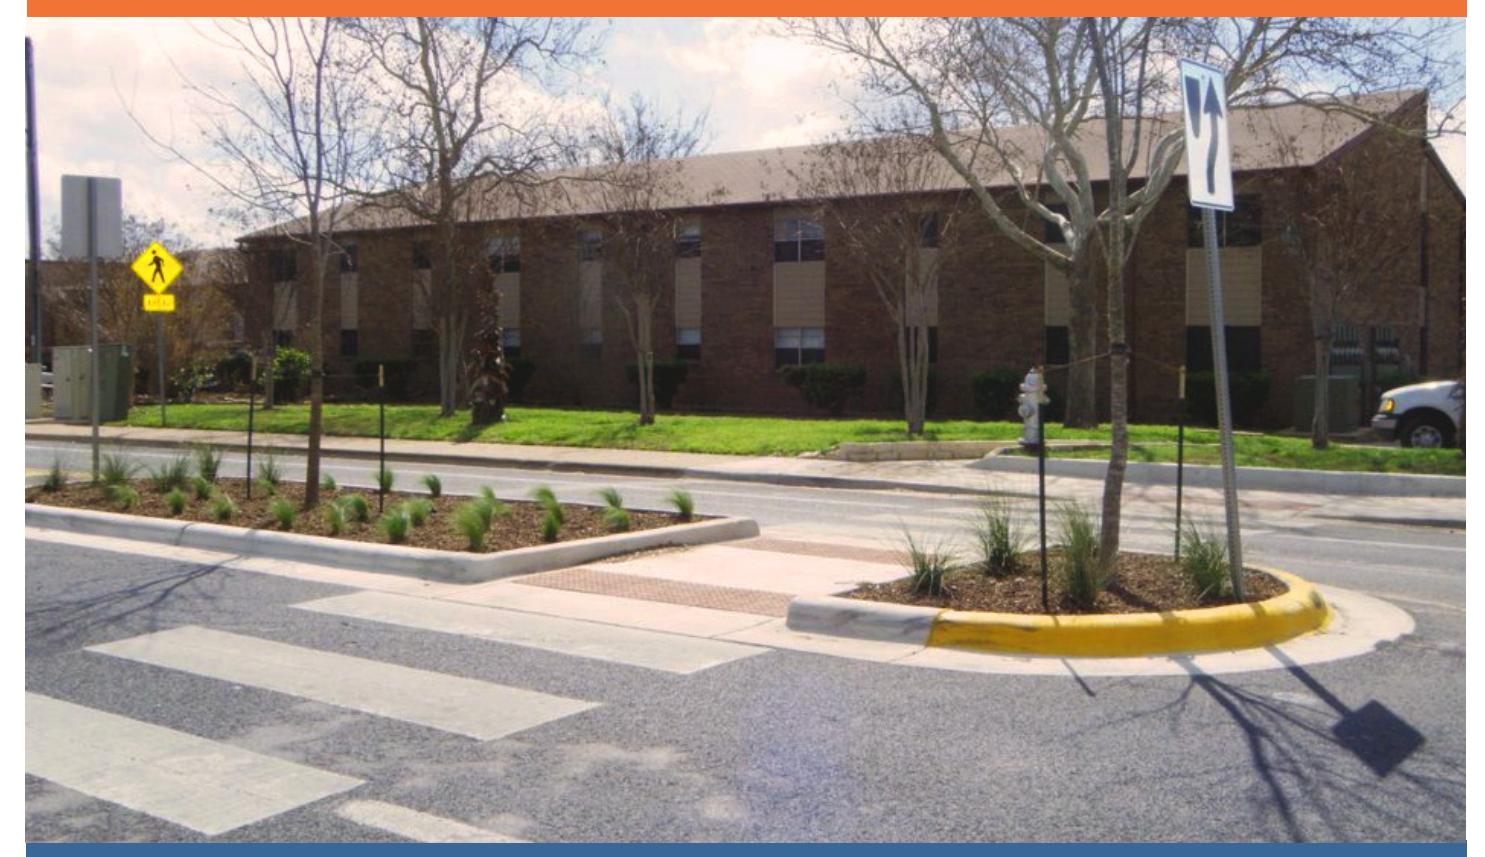

A raised intersection in Haddonfield, NJ. (Credit: VTC)

Signal Improvements

A pedestrian countdown signal displays the number of seconds remaining until the signal changes.

Pedestrian Refuge Island

This pedestrian refuge island cuts through a planted median in Austin, TX (Credit: NACTO)

Rectangular Rapid Flashing Beacon

RRFB at a mid-block crossing in Linwood, NJ.

Pedestrian Lighting

At this mid-block crossing, the pedestrian is illuminated for oncoming vehicles. (Credit: LowerEnergyDesigns.com)

Tight Curb Radii

This modified curb radius reduces the speed of turning vehicles and shortens the pedestrian crossing. (Credit: Michael Hintze)

Curb Extension

A painted (epoxy) curb extension with pylons was an effective interim or low-cost solution in Hoboken, NJ.

Daylighting

This daylight intersection in New Brunswick, NJ provides space for bike parking (Credit: njbikeped.org)

Wayfinding Signs

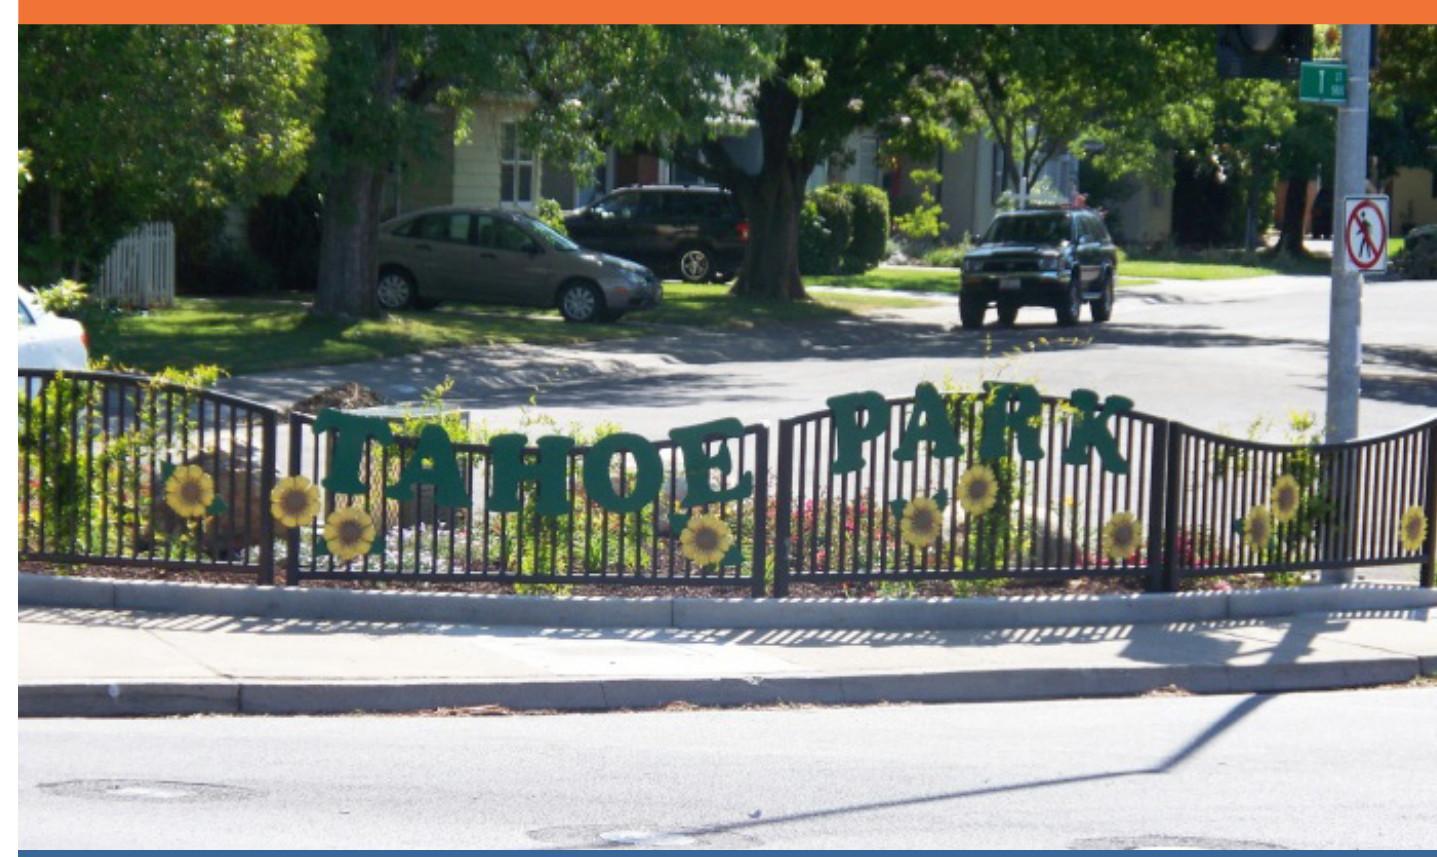

Wayfinding signs and systems are uniquely designed for the surroundings and context.

Parklet
